CENTRAL INTELLIGENCE AGENCY

Production in June 1955 NO. OF PAGES REQUIREMENT NO. RD REFFERENCES This IS UNEVALUATED Information SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE. 25X1 1. In June 1955, the production of the rolling mill of the VEB Stahl— und Walzwerk Brandenburg was 29,700 tons and that of the steel mill, 67,500 tons. The planned quota in both instances was exceeded. All of the Siemens—Nerten ovens at Brandenburg were in operation. 2. The funds (Invest—Mittel) allocated to the steel mill have been increased for the second year of the Five Year Plan; as a result, during 1956 a heavy sheet mill and a fine sheet mill are to be constructed. The total planning is on such a large scale that by the end of the Five-Year Plan the mill will have tripled its size. 3. In June 1955, mill train 750 at VEB Stahl— und Walzwerk Hennigsdorf was still in the same status as previously reported, I as a result, Brandenburg was forced to supply material for the other Hennigsderf mill trains. 4. The fine mill train at Riesa was operating at a 90 percent capacity as a result of a lack of material. 5. In June 1955, it was learned that, three weeks (sic) earlier, the large oil mill at Riesa had burned down. 8.—E.C.R.E.T.			S=E=C=R=E=	26. - 18. mil		25X
